THE JOB  
**Hallway Room Refresh**  
Seen on 12 January. Two days on site, booked to suit you.

What we would do

Your hallway is the hardest-working room in the house and the first one guests meet, and it has taken a decade of bags, bikes and wet coats. Nothing here is structural. It is simply a room that has never had everything done at once.

- Walls made good throughout: filled, sanded and the old picture fixings taken out properly
- Skirting, architrave and the understairs door prepared and repainted
- The front door eased so it closes without a shoulder, and the letterplate re-sealed
- Two sockets, the light switch and the loose banister re-fixed properly
- Coat hooks and a shelf fitted into solid ground rather than plasterboard
- Everything sheeted, and a proper clean at the end

**WHAT THIS PRICE MEANS**  
It is fixed. It does not move unless the job itself changes, and if it does we agree that with you in writing before doing any more work. No VAT, because we are not registered. No call-out fee. Everyday bits like filler, sealant, screws and basic white paint are already included and never itemised.

**AND ONE THING WE WOULD LEAVE ALONE**  
You asked about replacing the hall floor. Honestly, we would not, not yet. It is sound, it is original, and once the walls and woodwork are done you may well decide you like it. Live with it a year and see. If you still want it then, it will cost less on its own than bundled in here.
